

## Network Infrastructure Installation and Maintenance

We can assist you in the design and implementation phase of your network as well as all the troubleshooting on your existing network.

### **Networking Services that we offer:**

- ⑤ New network cable installation. Cat5 Cat5e and Cat6 cables.
- ⑤ Upgrade of existing network infrastructure.
- ⑤ Organising of network cables in server room.
- ⑤ Implementation of wireless networks and extenders.
- ⑤ Fault finding on network infrastructure as well as data point repairs.
- ⑤ Quality of Service (QOS) handling on LAN and WAN connections.
- ⑤ Network Attached Storage (NAS) setup and configuration.
- ⑤ File sharing and permissions.
- ⑤ File server implementation and configuration.

Networks are the backbone of your infrastructure, no network access or any problem on the network will result in your entire system experiencing downtime.
